Coal Projects

The application for renewal of EPC1993 lodged with the Department of Resources was successful. The Permit has been renewed for a 5-year period from 17 March 2021 with all sub-blocks retained.

Exploration expenditure of \$25,000 during the quarter included review of analytical data related to the progression of investigations into alternative strategies for the use of coal at the Blackall Project, and consideration of extraction methodologies.

There were no substantive mining production or development activities undertaken during the quarter. No field activities were scheduled or carried out during the quarter.

Sector Resources (AUH 5%)

AUH sees long term potential in the copper sector, to which Sector Resources Pty Ltd (Sector) provides entry through its exploration activities.

Sector has advised that heavier than usual rainfall over the summer of 2021 has resulted in a slippage of the planned exploration activities on site. Cultural Heritage clearances, pad and track preparation has now been completed and drilling is contracted to commence in May 2021. The program will focus on the areas in immediate proximity to the most recently drilled 2019 holes and will consist of mud rotary followed by diamond core sampling.
