

31 July 2023

ACTIVITIES REPORT FOR QUARTER ENDED 30th JUNE 2023

Coal Projects

During the June quarter AustChina (ASX: AustChina Holdings Limited) completed the preparatory field work for its planned exploration drilling programme with the completion of the cultural heritage inspection of the proposed drill sites.

Contracts were let for the drilling of 4 partly cored boreholes. Land Access Agreements (CCA) were agreed and executed. Downhole geophysical logging and coal analysis laboratory services are also in hand.

The exploration programme in EPCs 1719 and 1993 as shown in Figure 1 allows for the company to firm up the resource base with increased Indicated Resources (under the JORC Code) by closing up the drill hole spacings.

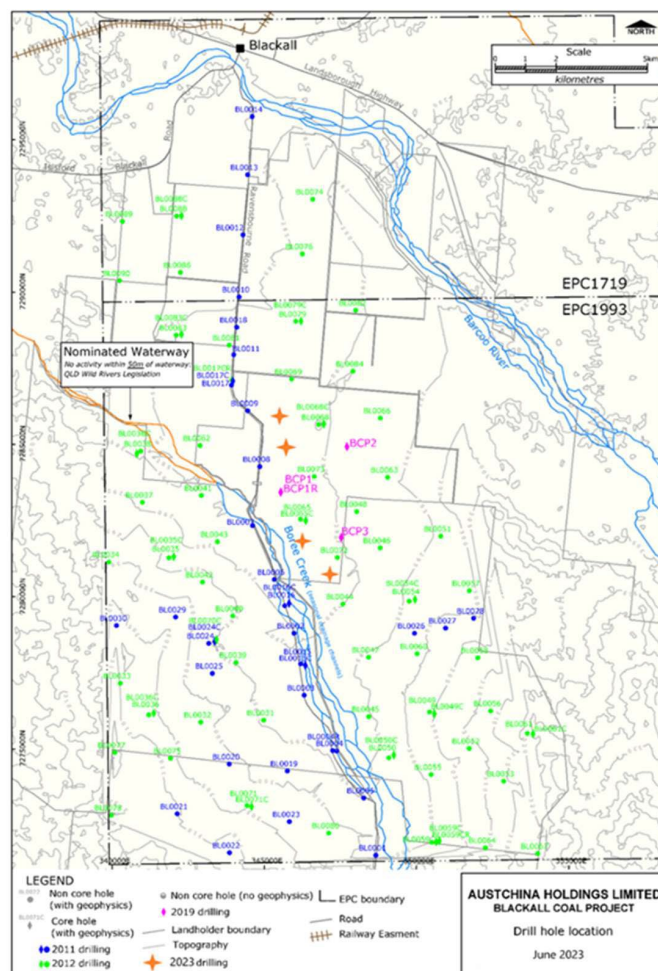

Figure 1: Drill hole location

This is necessary ahead of any decision as to an application for a Mineral Development Licence (a higher level of tenure under the Minerals Resources Act 1989) as a step towards development of the tenement. Additional samples will be obtained for evaluating alternative uses for the coal through new processes or technologies other than traditional methods such as use in coal fired power stations.

Post end of quarter, the drilling contractor has mobilised to site and the programme is in progress.

The company is drilling a core diameter of 100mm (4C) drilling to provide increased sample quantities for analysis compared to the 63mm (HQ) diameter utilised in previous drilling programmes.

Analysis will be carried out at the Mitra PTS laboratories in Rockhampton and Gladstone and will consist of standard coal industry tests (Proximate Analysis, Gross Calorific Value, Total Sulphur, Relative Density, Moisture Holding Capacity and Chlorine), on individual plies with additional tests on composite samples targeted to match potential mining section groupings. Further work will include float-sink testing. In addition to the standard tests, composite and “floats” samples will include Ultimate Analysis, Ash Analysis, Ash Fusion testing, Hardgrove Grindability Index testing and Trace Element Analysis. Petrographic work will be carried out on selected samples. Additional samples will be reserved for further coal utilisation testing as may be required.

Laboratory analysis is anticipated to take 3-4 months. Once analytical data is to hand, geological modelling and interpretation will follow and it is expected that an update on the JORC resource status of the Blackall Coal Project will be available by the end of calendar 2023.

The company continues to investigate alternative technologies to utilise its coal on-site, including research into these technologies where appropriate.

Tenement Portfolio Update

Tenements held at the end of the quarter and their locations are as follows:

TENEMENT	NAME	HOLDING
EPC 1719	Barcoo River/Blackall	100%
EPC 1993	Blackall South Corner	100%

CORPORATE ACTIVITIES:

Investment in Utilitas

AustChina holds 24.71% of Queensland based bioenergy developer Utilitas Group Pty Ltd.

Utilitas advised the infrastructure scale bio Refinery product offering has been met with successful market engagement, achieving early commitment from project partners.

Utilitas has announced a pre-IPO funding round, engaging sophisticated investors unlocking development funding on the first three projects including flagship at Bundaberg and kickstarting development of their pipeline of bio Refinery assets in Australia.

Investment in Revolver Resources Holdings Limited (ASX: RRR)

Revolver Resources continues exploration of its Osprey and Dianne Copper projects. Large scale Heli-Em surveying at its Osprey project has been completed and a further 2,000m of diamond drilling has commenced at its Dianne Copper project.ⁱ

AUH continues to see long term potential in the copper sector.

Payments to Related Parties

A total of \$19,000 was paid to directors and their associates for salaries, director fees and superannuation during the quarter ended 30 June 2023.

Authorised by the Board.

Yours faithfully,

Daniel Chan – Chairman

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
